

Muhammed Farhan Sadique Mahi

Flutter Developer | Mobile & Desktop Applications

Dhaka, Bangladesh | +8801881960259

sadiquefarhan038@gmail.com | github.com/farhans-codes

PROFILE

Flutter developer with experience delivering mobile interfaces, desktop utilities and applied AI projects. Focused on feature-first Clean Architecture, maintainable code and practical problem-solving. Uses AI coding assistants while retaining ownership of code security, correctness and architecture.

PROFESSIONAL EXPERIENCE

Junior Flutter Developer | IRD Foundation

December 2025 - Present

- Contribute to One Ummah, an IRD Foundation app available on Android and iOS; translate Figma designs into functional Flutter interfaces.
- Develop core features including a dynamic Qibla compass and a YouTube live-streaming module for Makkah and Madinah feeds.
- Maintain the application, resolve bugs and deliver feature updates. Review AI-assisted code for correctness and alignment with feature-first Clean Architecture.

Intern Flutter Developer | IRD Foundation

September 2025 - December 2025

- Collaborated with senior engineers to turn UI requirements into modular, reusable components.
- Gained hands-on experience with the software development lifecycle and Git/GitHub version control.

SELECTED PERSONAL PROJECTS

AI Limit Status | Flutter desktop application

Open-source utility that displays Codex and Claude usage limits in the macOS menu bar and Windows taskbar. Includes automatic refresh, usage notifications and release downloads. Independent community project, MIT licensed.

Task Manager | Flutter application

Task management application with REST API integration, authentication, task status views and profile management.

Brain Tumour Classification | Academic web prototype

Python, Flask and TensorFlow image-classification prototype with image upload, model inference and PDF report generation. Academic research software.

Muhammed Farhan Sadique Mahi

Flutter Developer | Skills, research & education

TECHNICAL SKILLS

Primary: Flutter, Dart, Material UI widgets, feature-first Clean Architecture

Languages: Python, C; basic Java and Kotlin

Data & AI: SQL, REST API integration, TensorFlow Lite, image classification

Tools: Android Studio, VS Code, Git, GitHub

AI coding tools: Cursor, Claude Code, Codex, Antigravity

RESEARCH & PUBLICATIONS

DeepMedScan: a CNN-driven brain tumour detection system with web-based clinical decision support

Co-author. International Journal of Artificial Intelligence in Healthcare, Vol. 1, No. 2, 2026, pp. 148-159.

doi.org/10.1504/IJAIH.2026.154457

DragonFruitQualityNet: A Lightweight Convolutional Neural Network for Real-Time Dragon Fruit Quality Inspection on Mobile Devices

Co-author. arXiv preprint, submitted August 2025. Lightweight CNN for on-device fruit quality classification.

arxiv.org/abs/2508.07306

EDUCATION

BSc in Computer Science & Engineering | 2021-2025

Manarat International University, Dhaka | CGPA: 3.37 / 4.00

Higher Secondary School Certificate | 2018-2020

Ideal College, Dhaka | GPA: 4.58 / 5.00

Secondary School Certificate | 2017-2018

Cambrian School & College, Dhaka | GPA: 4.44 / 5.00

TRAINING & LEADERSHIP

Flutter App Development Course - Ostad, 2025

President, MIU CSE Club - 2024

Campus Ambassador, Robomen BD - 2023

Participated in the AUST Rover Challenge and MIU CSE Programming Contest.
